

Project Design Phase-II

Data Flow Diagram & User Stories

Date	02 October 2026
Team ID	SWTID-2026-8568
Project Name	Auto Ticket Classification
Maximum Marks	4 Marks

Data Flow Diagram

The flowchart below represents the Auto Ticket Classification process using ServiceNow Flow Designer. It shows ticket creation, predefined keyword classification, Category/Subcategory update, ticket storage, and email notification.

Project-specific classification: WiFi/Network → Network / Wi-Fi; Projector → Hardware / Projector; Password/Login → Access / Forgot Password; Slow/Hanging → Performance / Slow Computer.

User Stories

Use the template structure to list the user stories for the Auto Ticket Classification product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Student / Teacher	Ticket Creation	US-1	As a user, I can create an IT support ticket by providing the caller and issue short description.	A new ticket record is created with an auto-generated ticket number.	High	Release-1
Student / Teacher	Ticket Creation	US-2	As a user, I can provide a short description such as a WiFi, projector, password/login, or slow/hanging issue.	The submitted ticket contains the entered issue description.	High	Release-1
IT Helpdesk	Automatic Classification	US-3	WiFi or Network keywords are automatically classified as Network / Wi-Fi.	Category = Network; Subcategory = Wi-Fi.	High	Release-1
IT Helpdesk	Automatic Classification	US-4	Projector keywords are automatically classified as Hardware / Projector.	Category = Hardware; Subcategory = Projector.	High	Release-1
IT Helpdesk	Automatic Classification	US-5	Password or Login keywords are automatically classified as Access / Forgot Password.	Category = Access; Subcategory = Forgot Password.	High	Release-1
IT Helpdesk	Automatic Classification	US-6	Slow or Hanging keywords are automatically classified as Performance / Slow Computer.	Category = Performance; Subcategory = Slow Computer.	High	Release-1
Caller	Email Notification	US-7	The caller receives an automated email after ticket creation.	Confirmation email is sent to caller email.	High	Release-1
IT Helpdesk	Ticket Data	US-8	View ticket number, caller, category, subcategory, description, and state.	Configured ticket fields are visible.	High	Release-1
IT Helpdesk	Ticket Data	US-9	View Assigned Group and Assigned To when populated.	Reference fields display assignment information.	Medium	Release-1
Administrator	Flow Maintenance	US-10	Maintain Flow Designer conditions when keywords or categories change.	Classification branches can be updated.	Medium	Release-2
Administrator	Deployment	US-11	Store project configuration in an update set for transfer.	Project Update Set can be completed/exported as XML.	Medium	Release-2
IT Helpdesk	Validation	US-12	Test representative issue descriptions and verify classification and email.	Expected classification and email are produced.	High	Release-1
