

User Acceptance Testing (UAT) Template

Date	02 October 2026
Team ID	SWTID-2026-8568
Project Name	AUTO-TICKET CLASSIFICATION USING FLOW DESIGNER
Maximum Marks	—

Project Overview:

Project Name: AUTO-TICKET CLASSIFICATION USING FLOW DESIGNER

Project Description: A ServiceNow Flow Designer solution that automatically classifies school IT support tickets by evaluating keywords in the Short Description and assigning the appropriate Category and Subcategory.

Project Version: 1.0

Testing Period: 02 October 2026 to 02 October 2026

Testing Scope:

Features and Functionalities: Ticket creation; keyword-based classification; automatic Category/Subcategory assignment; Flow Designer execution; validation of ticket data; basic access/security validation.

Requirements: Users enter Caller Name and Short Description only; WiFi maps to Network/WiFi; Projector maps to Hardware/Projector; Password or Login maps to Access/Forgot Password; Slow or Hanging maps to Performance/Slow Computer.

Auto-Ticket Classification – Flow Designer Logic

Figure 1: Illustrative Flow Designer classification path used for UAT.

Testing Environment:

URL/Location: ServiceNow project environment / Flow Designer. Reference: ServiceNow Flow Designer documentation.

Credentials (if required): Project environment credentials to be provided by the authorized tester.

UAT Test Evidence – Sample Ticket Classification

Short Description	WiFi is not working in the computer lab
Expected Category	Network
Expected Subcategory	WiFi
Automation	Flow Designer
UAT Result	PASS – classification rule matched

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Positive – WiFi keyword classification	1. Create a ticket. 2. Enter Caller Name. 3. Enter "WiFi is not working". 4. Submit the ticket.	Category = Network and Subcategory = WiFi.	Ticket classification should be verified in the project environment.	PASS / FAIL
TC-002	Positive – Projector keyword classification	1. Create a ticket. 2. Enter Caller Name. 3. Enter "Projector is not working". 4. Submit the ticket.	Category = Hardware and Subcategory = Projector.	Ticket classification should be verified in the project environment.	PASS / FAIL
TC-003	Positive – Password/Login classification	1. Create a ticket. 2. Enter Caller Name. 3. Enter "Forgot Password / Login issue". 4. Submit the ticket.	Category = Access and Subcategory = Forgot Password.	Ticket classification should be verified in the project environment.	PASS / FAIL
TC-004	Positive – Slow/Hanging classification	1. Create a ticket. 2. Enter Caller Name. 3. Enter "Computer is Slow/Hanging". 4. Submit the ticket.	Category = Performance and Subcategory = Slow Computer.	Ticket classification should be verified in the project environment.	PASS / FAIL
TC-005	Negative – Unrecognized keyword	1. Create a ticket. 2. Enter Caller Name. 3. Enter a description without the predefined keywords. 4. Submit the ticket.	No incorrect predefined classification should be assigned; behavior should be reviewed against project configuration.	Record the actual behavior observed during UAT.	PASS / FAIL

Test Cases:

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No defect recorded at document preparation time; update during UAT if an issue is found.	If a defect occurs: reproduce the failed test case and record the exact input and flow behavior.	To be assigned	Open / Closed	Use this row to record tester feedback, severity and resolution.

Sign-off:

Tester Name:

Date: 02 October 2026

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
